About Us

Gas Tech International Limited is building Nigeria's next-generation CNG infrastructures, delivering end-to-end solution from sourcing and compression to storage and distribution. Established in September 2022, Gas Tech has emerged as one of Nigeria's largest producers and distributors of Compressed Natural Gas (CNG) via a state-of-the-art virtual pipeline network. Full-scale compression operations began in March 2025, marking a significant milestone in Gas Tech's commitment to driving the adoption of cleaner, more sustainable energy sources across Nigeria.

The company's flagship facility is a 90,000-square-meter CNG Compression Station strategically located along the Sagamu-Benin Expressway, Iperu, Ilisan-Remo, Ikenne LGA, Ogun State. This prime location provides excellent accessibility and service coverage across the South-West and beyond, positioning the station as a vital hub in Nigeria's energy transition. With a current processing capacity of 14.5 MMSCFD, powered by Ten (10) Compressors, and an additional expansion underway dedicated to meeting the energy needs of transport fleets, commercial clients, and industrial facilities.

The above capacity represents our initial step in our commitment to providing CNG solutions to Nigerians, aimed at meeting the growing demand for a more affordable alternative fuel across all sectors. Looking ahead, we plan to expand by establishing additional daughter stations and upgrading our facilities to accommodate and support a larger number of off-takers. Our goal is to further enhance the efficiency and affordability of the fuel supply system.

Mission Statement

To operate a state-of-the-art CNG mother station with unwavering reliability, enabling sustainable mobility and clean energy access through a well-planned safety procedure to enhance transportation and industries nationwide.

Vision Statement

To be recogniszed as the powerful benchmark for excellence in CNG compression and distribution, and a sustainable future by being the most trusted and impactful hub powering regional growth and energy security through a reliable and expansive mother station and supply network.

Core Values

S

Safety

We are committed to safeguarding employees, customers, assets and data, the community, and natural habitats through constant awareness, initiative-taking risk management, and responsible practices.

I

Integrity

We uphold the highest ethical standards by ensuring honesty and transparency in all actions and relationships. We foster an inclusive and supportive workplace where everyone feels valued, heard, and empowered to contribute their best.

S

Sustainable Innovation

We are committed to advancing and continuously improving by fostering creativity and forward-thinking solutions that address today's challenges and shape a better future for tomorrow.

C

Customer Focus

We strive to understand and fulfill the evolving needs of our customers by providing exceptional service and support.

R

Reliability

We ensure a consistent and dependable supply of CNG through meticulous operations and continuous optimal efficiency.

O

Operational Excellence

We strive for efficiency and effectiveness in every aspect of our operations, from product reception to distribution.

G

Governance & Compliance

We uphold the highest standards of governance and integrity in all our operations by fully complying with all applicable laws.

Reliable 24/7 CNG Refuelling Infrastructure.

Gas Tech NGV Station provides 24/7 CNG refuelling services, ensuring dependable access to clean and cost-efficient fuel for a growing fleet of trucks, commercial vehicles, and other CNG-powered transportation.

Designed to support high-volume vehicle operations, the station is equipped with modern refuelling infrastructure that promotes efficiency, reliability, and faster turnaround times.

Key Infrastructure

- 12 Autogas Dispensing Points for efficient and seamless vehicle refuelling.
- 10 Skids Fill Posts designed to support high-volume CNG distribution and fleet operations.
- 75 kg/minute Open-Air Filling Capacity, equivalent to approximately 105 SCM/minute, enabling rapid and efficient refuelling.

Gas Tech NGV Station combines capacity, accessibility, and reliability to provide a dependable energy solution for fleet owners, logistics operators, commercial transport companies, private vehicle owners and other high-volume users.

Why partner with us?

- Bulk CNG Supply via virtual pipeline Network.
- CNG Compression & Distribution Services.
- Fleet Fuel Solutions (Autogas).
- Energy Transition Consultancy.
- Backed by full-time Gas Tech support.
- OEM Partnerships & Infrastructure Deployment.
- End-to-end integrated Service Model.
- Proven Safety-First Culture.
- On-site CNG Infrastructure Development.
- Complete Comprerssed Natural Gas Based IPP Solution
- Seamless 24/7 Operations, ensuring rapid response everyday, every mile.
- Telemetric Moniotoring for Real-Time Presure, Flow, & Gas-Level Tracking.

GAS TECH ADVANCED CNG TECHNOLOGY INFRASTRUCTURE

At the forefront of Nigeria's CNG infrastructure, we leverage advanced gas technology, robust facilities, and smart monitoring systems to drive operational efficiency, enhance service delivery, and deliver reliable, seamless, and innovative gas solutions.

Our state-of-the-art infrastructure is equipped with the following:

- 6 × BBR 4217 1700 SCMH
- 2 × BBR 8018 1250 SCMH
- 2 × KGC 34 3000 SCMH
- 6 × Autogas Dispenser Posts
- 12 × NGV Dispenser Nozzles
- 1 × 5000 SCM CNG Ground Storage Facility

These strategically deployed assets demonstrate our commitment to reliability, efficiency, safety, and excellence in our service delivery.
